Fall Protection Training and Consulting

## **FALL PROTECTION AWARENESS**

This class will provide the basic training of fall protection for employees expected to use fall protection equipment. This class will provide training necessary to meet the requirements of OSHA for users of equipment and meet the ANSI requirements to certify employees as Authorized Users.

## **AGENDA**

1. History of Fall Protection
2. Fall Statistics
3. OSHA Standards
4. ANSI Standards
5. Estimation of free fall distance
6. Estimation of fall arrest distance
7. Proper use of fall protection equipment
8. Proper inspection of equipment
9. Proper storage of equipment
10. Environmental factors

The course will be four to eight hours and certification of training will be provided. *Please note per ANSI standards, the certificate is valid for a period of two years.*
